

BUENA VISTA PARK UPGRADE

Project Information

In 2024, Buena Vista Park will receive upgrades as part of the City's Park Upgrade Program, an ongoing capital project that funds improvements to established neighbourhood parks to address deficiencies and bring them up to current standards.

Upgrades to the park will include:

- Widened pathways
- New pathway lighting
- Updated site furniture
- Upgraded irrigation system
- Enhanced plantings

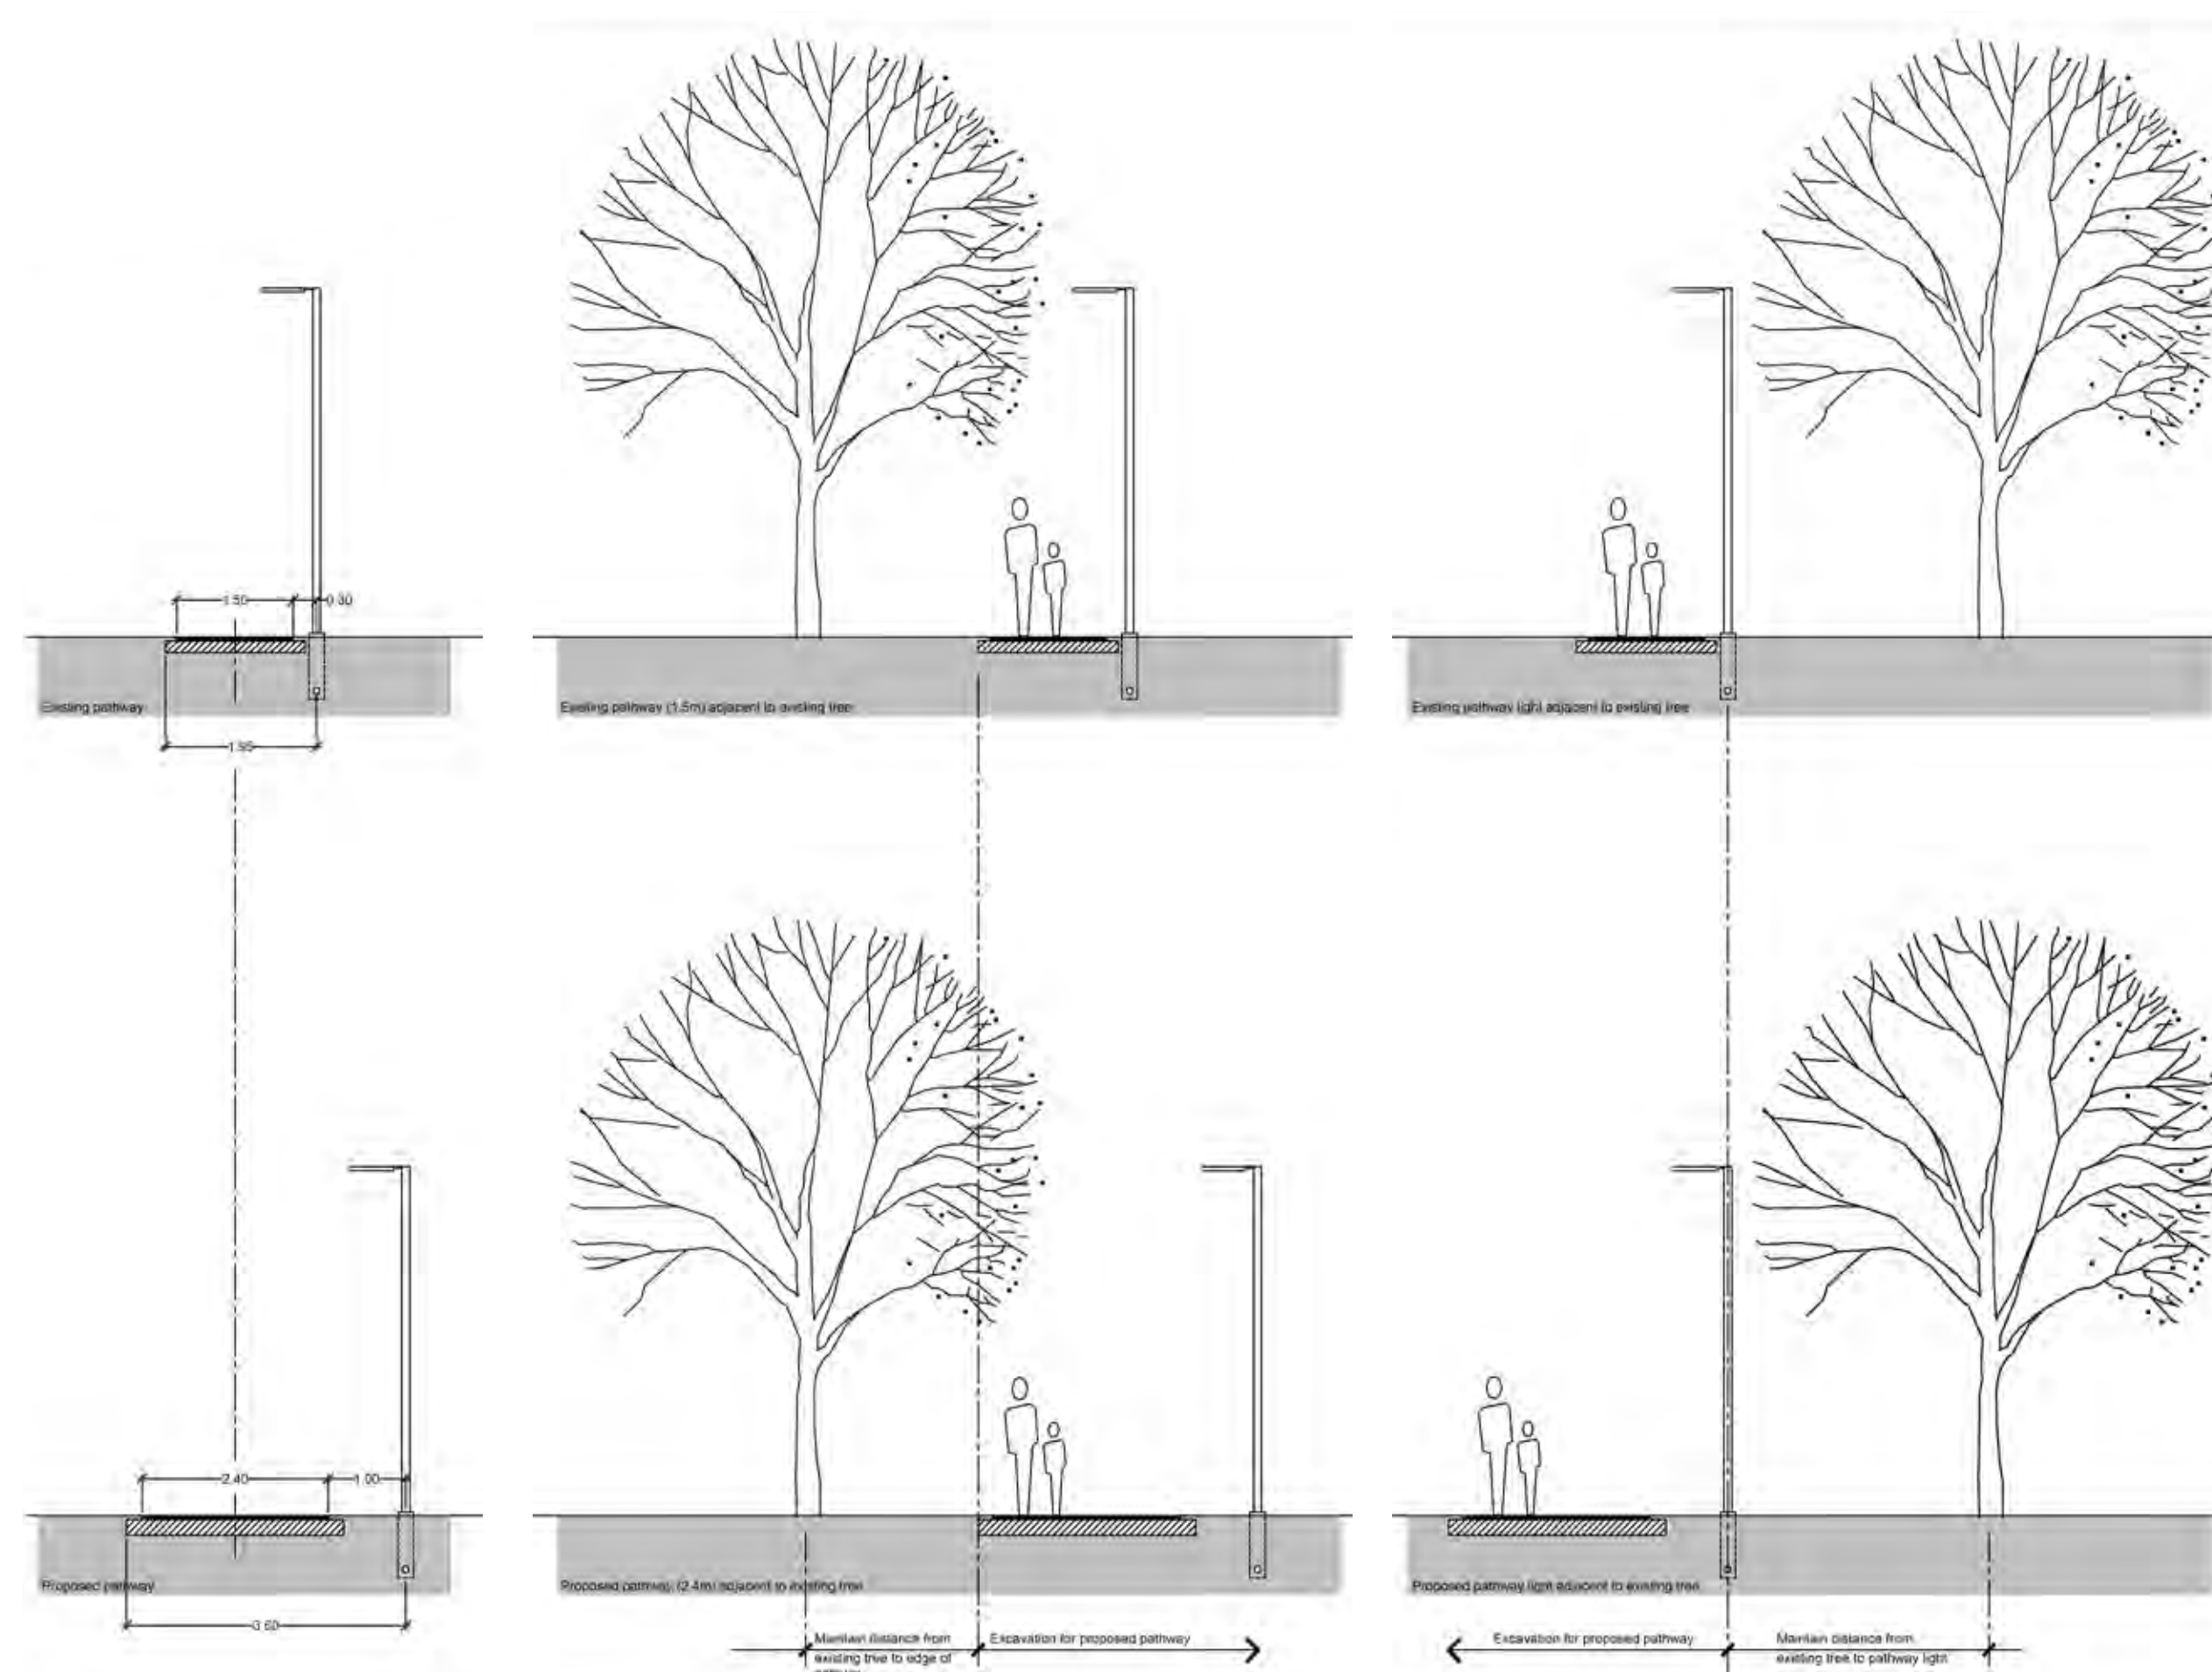

BUENA VISTA PARK UPGRADE

Pathways & Plantings

Park parkways will be widened to 2.4 metres to meet current standards. The new layout will provide a better flow and more accessible green space.

It is anticipated that one tree will need to be removed to accommodate the new pathway location; however, approximately 40 new trees will be planted throughout the park.

BUENA VISTA PARK UPGRADE

Proposed Construction Schedule

Construction for the Buena Vista Park upgrade project is expected to be completed in 2024, with some restrictions in place in 2025 to protect newly planted areas. While most of the park will be closed throughout construction, we are aiming to keep the paddling pool, playground, basketball court and lawn bowling areas open as much as possible. However, we are not able to confirm the potential impacts on these locations until the tender is awarded and a construction schedule is developed.

What to Expect

- Once park closure dates are known, they will be communicated to the Buena Vista Community Association, Lawn Bowling Club and area residents.
- Construction fencing will be installed to separate the construction zone from the public.
- A site safety review will be conducted before construction begins.
- Detour routes will be identified for pedestrians who typically walk or bike through the park.
