Data Definitions

It is important to note that the Generation5 data source is an estimate only and not a true census count. This means that the Generation5 data cannot be directly compared to Federal Census data to determine if there was a change from one year to the next.

Data Sources

In addition to the Generation5 estimates and the Statistics Canada data used in this publication, data from other sources are also included such as vehicle registration from SGI and school enrolment from the Saskatoon Public School Division and the Saskatoon Catholic Board of Education

It is important to keep in mind that both the Census and Generation5 data are simply “snapshots” of one moment in time and will never be current as of today’s date.

Data Comparability

Statistics Canada has altered questions from previous Censuses making comparisons difficult with some data sets. Since the estimates provided by Generation5 use the same variable definitions as Statistics Canada, these issues also apply to the Generation5 data in this publication. It is important to note that Generation5 data are estimates only and not a true census count. This means that the Generation5 data cannot be directly compared to Federal Census data to determine if there was a change from one year to the next.

Detailed Description of Profile Data

Age of Dwelling

Source: Statistics Canada – Federal Census

Sample: 20%

Date: 2006

Description: This refers to the period in which the building was originally built, not the time of any later remodelling, additions or conversions. Respondents were asked to indicate the period of construction, to the best of their knowledge.

G5 estimates were not used for this variable because the estimates assigned dwelling numbers to time periods that did not correspond to historical neighbourhood development.

Age Group

Source: Statistics Canada – Federal Census and Generation5

Sample: 20%/100%

Date: 2006; 2009

Description: Describes the age and sex characteristics of Saskatoon’s population through the use of a population pyramid.

Commuter Destinations

Source: Statistics Canada – Federal Census

Sample: 20%

Date: 2006

Description: Provides a count of the number of residents from the featured neighbourhood (origin) that commute to the listed neighbourhoods for work. The top 5 destinations neighbourhood are listed. This information is displayed on a map on the last page of each profile.

Dwellings

Number of Dwellings

Source: Statistics Canada – Federal Census and Generation5

Sample: 20%

Date: 2006; 2009

Description: Includes the number of dwellings per neighbourhood broken down by dwelling type. Dwelling is defined by Statistics Canada as a set of living quarters in which a person or group of persons reside.

Density of Dwellings

Source: City of Saskatoon Planning and Development Branch

Sample: n/a

Date: 2006; 2009

Description: This measure is calculated by dividing the number of dwelling-units by the gross area of each neighbourhood (hectares and acres).

Education Level

Source: Statistics Canada – Federal Census and Generation5

Sample: 20%

Date: 2006; 2009

Description: Describes the highest level of education attained for those aged 15 years and older.

Employment

Source: Statistics Canada – Federal Census and Generation5

Sample: 20%

Date: 2006; 2009

Description: Describes employment characteristics such as total labour force, employment, unemployment, labour force participation rate and unemployment rate.

Ethnic Diversity

Source: Statistics Canada - Federal Census

Sample: 20%

Date: 2006

Description: The Diversity Index is calculated using the following index variables: Visible Minority, Mother Tongue, Home Language and Aboriginal Identity. Each of these index variables provides an insight into the minority populations found within the City. The Diversity Index is calculated differently than the 2001 Diversity Index. The 2001 Diversity Index only looked at the Single Ethnic Origin variable from the Census.

Each index variable (e.g. visible minority, mother tongue, home language or Aboriginal population) at the neighbourhood level is compared to the City level. The resulting number assesses what proportion of each group of people lives where, as compared to the proportion of the total City population. The Diversity Index is the sum of the individual indexes of the visible minority, mother tongue, home

language and Aboriginal identity indexes.

The Diversity Index is not calculated on an annual basis using Generation5 data. The estimate of visible minority populations is highly variable using this data source.

Family Structure

Source: Statistics Canada – Federal Census and Generation5
Sample: 20%
Date: 2006; 2009
Description: Describes several characteristics of Saskatoon families and households. A household is defined by Statistics Canada as a person or group of persons who occupy the same dwelling and do not have a usual place of residence elsewhere in Canada. A distinction is made in the table between a family and a non-family household. A family household must have at least one census family.

Household Income

Source: Statistics Canada – Federal Census and Generation5
Sample: 20%
Date: 2006; 2009
Description: Describes the average income characteristics of households.

Housing Affordability Index

Source: Statistics Canada – Federal Census and Generation5, City of Saskatoon Planning and Development Branch and Assessment Branch
Date: 2006; 2009
Description: Housing affordability is measured as a ratio of a neighbourhood's median dwelling selling price to Saskatoon's median household income, also known as the "median multiple". 3.0 is considered the "affordability" standard (3 or less is considered affordable; over 3.0 not as affordable).

Housing by Tenure

Source: Statistics Canada – Federal Census and Generation5
Sample: 20%
Date: 2006; 2009
Description: Describes the type of housing tenure: homeowner or renter.

Housing Costs

Source: Statistics Canada – Federal Census and Generation5
Sample: 20%
Date: 2006; 2009
Description: Describes the average gross rent and average owner's major payments for each neighbourhood.

Licensed Home-Based Businesses

Source: City of Saskatoon Planning and Development Branch - Business License Group
Date: 2009
Description: This figure represents the number of home-based businesses registered with the City of Saskatoon based on paid business license fees.

Major Occupation

Source: Statistics Canada – Federal Census and Generation5
Sample: 20%

Date: 2006; 2009

Description: Describes the type of employment classification for population aged 15 years and older. These are the main categories derived by Statistics Canada to classify the Canadian labour force.

Mode of Travel to Work

Source: Statistics Canada – Federal Census and Generation5

Sample: 20%

Date: 2006; 2009

Description: Describes the primary mode of travel to work for population aged 15 years and older with a regular place of work or no fixed workplace address.

Mother Tongue

Source: Statistics Canada – Federal Census

Sample: 20%

Date: 2006

Description: Describes neighbourhood population by the first language learned at home. The top five languages are presented for each neighbourhood.

Annual estimates from Generation5 for mother tongue are not calculated. The estimate of population by mother tongue is highly variable using this data source.

Park Space per Person

Source: City of Saskatoon Planning and Development and Leisure Services Branches

Date: August 2010

Description: This measure is simply the number of acres of park space per person measured at a neighbourhood level. Park space includes all parks located within the boundaries of profiled neighbourhoods. The area (in acres) of each of park is also given. Park types are broken down into the following categories:

Neighbourhood Parks - Centrally located within a neighbourhood, these parks are designed for families, young children and informal use such as picnics. Any sports fields are free to users and may accommodate some intra-neighbourhood league play.

District Parks - Intended to serve four or five neighbourhoods, District Parks accommodate active and passive recreation, and may have a particular emphasis on the athletic needs of high school students. There is a charge to book and use sports fields in these parks.

Multi-District Parks - As with District Parks, there is an emphasis on structured sports in Multi-District Parks. Sports fields are suitable for international competitions and there are booking charges associated with using these fields.

Industrial Parks – are citywide resources. Each park responds to the unique site circumstances or provides unique programming opportunities. The location in industrial areas allows elements which are not suitable for residential neighbourhoods. This type of park can also facilitate the needs of employees working in the industrial area (e.g. landscaping, outdoor furniture).

Special Use Parks - are citywide resources. Each park responds unique site circumstances and/or provides unique programming opportunities. The Forestry Farm Park, the Gordon Howe Complex, and Diefenbaker Park are examples of Special Use Parks. Most special use parks are not part of a residential neighbourhood.

Population

Source: Statistics Canada – Federal Census and Generation5
Sample: 20%/100%
Date: 1986-2006; 2009
Description: Indicates total population.

Real Estate Sales

Source: City of Saskatoon Assessment Branch, from data supplied by the Province of Saskatchewan Land Titles office.
Date: Calendar year ending 2009
Description: This measure describes real estate transaction information for the 12-month period by housing type. This information does not include none-arms lengths transactions - for example, sales between family members.

Enrolment

Saskatchewan Institute of Applied Science and Technology Students

Source: SIAST, Kelsey Campus
Date: 2008, 2009, 2010 (partial year)
Description: Represents the enrolment, based on Kelsey students 'term-time' mailing address for the academic year.

University of Saskatchewan Students

Source: University of Saskatchewan Registrar's Office
Date: 2008, 2009, 2010
Description: Represents the enrolment, based on students mailing addresses of University of Saskatchewan students for the academic terms.

Public Elementary and High School

Source: Saskatoon Public School Division
Date: 2008, 2009, and 2010
Description: Data for school enrolment based on student's neighbourhood of residence at September 30 of the applicable year. Similar data for the separate school division was unavailable.

Enrolment by School

Public and Separate Elementary and High Schools

Source: Saskatoon Public School Division, Greater Saskatoon Catholic Schools
Date: 2008, 2009, and 2010
Description: Data for school enrolment was supplied by the above mentioned educational institutions and is current as of September 30 of the applicable year. It should be noted that students enrolled in a school may not necessarily reside in that neighbourhood.

Vehicle Registration

Source: Saskatchewan Government Insurance
Date: Nov. 1, 2008 – Oct. 31, 2009
Description: The number of vehicles per resident is calculated by dividing the number of registered vehicles in a neighbourhood by the neighbourhood's population.

Voter Participation - Municipal

Source: City of Saskatoon City Clerk's Office

Date: 2003, 2006, 2009

Description: This measure breaks down voter participation in the 2003, 2006, and 2009 Civic Elections to the neighbourhood level. In most cases poll areas corresponded with neighbourhood boundaries, but not all. The following pairs of neighbourhoods have identical voter participation rates because they were serviced by the same poll for the **2009** election:

- Sutherland/U of S Lands South MA
- North Park/Richmond Heights
- Kelsey Woodlawn/Mayfair
- Confederation Suburban Centre/Fairhaven
- Hampton Village/Westview
- Airport Business Area/Lawson Heights Suburban Centre
- Avalon/The Willows
- Erindale/University Heights Suburban Centre

In addition, Exhibition and Queen Elizabeth share a poll area, but Exhibition includes a second poll area. Hence the difference in voter participation between these neighbourhoods

Voter Participation – Provincial

Source: Province of Saskatchewan, Chief Electoral Officer

Date: February 2003, November 2007

Description: Voter participation in the 2003 and 2007 Provincial Election is broken down to show neighbourhood results (where available). Where poll division boundaries did not correspond to neighbourhood boundaries, polling division results were split between neighbourhoods based on the relative estimated population in each area. Affected neighbourhoods vary from election to election, but most are affected by this in at least one election year.

Voter Participation – Federal

Source: Elections Canada

Date: 2004, 2006, 2008

Description: Voter participation in the 2004, 2006, and 2008 Federal Elections are broken down and combined to show neighbourhood by neighbourhood results (where available). Where poll division boundaries did not correspond to neighbourhood boundaries, polling division results were split between neighbourhoods based on the relative estimated population in each area. Affected neighbourhoods vary from election to election, but most are affected by this in at least one election year.
