

2010 Flood Protection Program

Plumbing Contractors List

The contractors listed below have expressed interest in performing the plumbing work required for the **2010 Flood Protection Program**. The contractor you select to perform the plumbing work for your property under the **2010 Flood Protection Program** may be **any** mechanical contractor licensed with the City of Saskatoon. It is not necessary to select a contractor only from this list. The yellow page listings in the telephone book contain names of other licensed contractors who may also perform work under the **2010 Flood Protection Program**.

Tips for Hiring a Licensed Plumbing Contractor

Provided by the The Mechanical Contractors Association of Saskatchewan Inc.

With the threat of home water damage at stake, and to make sure the job is done right on the first visit, it is important that you hire a competent and professional plumbing contractor. If you do not currently deal with a licensed plumbing company, but are looking for a reputable firm, keep these tips in mind:

- 
- **Be sure the contractor is a licensed plumbing contractor and the technician is a qualified plumber, licensed in Saskatoon.**
 - **Find out if the work is covered by warranty or maintenance contract before hiring a contractor.**
 - **Ask if the contractor is familiar with the City of Saskatoon Flood Protection Program.**
 - **Ask your neighbors, family and friends for recommendations.**
 - **Ask for references and check them.**
 - **Obtain at least two written estimates for any work necessary.**
 - **Be wary of any contractor offering a “special deal” over the telephone or at your door.**
