Downtown

Average Annual Daily Traffic (AADT) is the average volume of traffic for the average one day (24-hour) period at a specific location or specific segment of road. The AADT volumes shown on this map are the most recent data from the 2021 - 2025 AADT Reports.

Significant traffic patterns changes occurred city-wide in 2021 due to the COVID-19 Pandemic. The Broadway Bridge was closed for rehabilitation in 2025, which may have impacted localized travel patterns and volumes.

The City uses industry acceptable methods to ensure the accuracy and reliability of the AADT Map, however, the City makes no warranty whatsoever as to the accuracy of the AADT Map provided, nor any warranty, either expressed or implied, as to the merchantability or fitness for a particular purpose. The City accepts no responsibility or liability for errors which may be contained in the AADT Map, whether such errors develop during the production stage or subsequently during the reproduction of the AADT Map.
