

School Zone Snow Removal

What you can expect:

To improve visibility where children are dropped off and picked up, City or contractor crews remove the piles once the average height of snow piles is 60 cm.

The City measures the height of snow piles in school zones once all priority streets grading is complete.

Prioritized school zones will have snow piles removed after every snow event (Snowfall > 5cm).

How you can help:

For their safety, keep children off the snow piles. The piles are not as sturdy as they can appear.

Be courteous and do not block traffic by parking beside a snow pile.

Watch for No Parking signs posted a minimum of 24 hours in advance of snow removal and move your vehicle so the City can access the snow piles.
