SUBJECT: Cumberland Park Storage Building - Asbestos Registry Report

Please find attached our laboratory's results for the bulk material samples taken from Cumberland Park Storage Building located at 1415 8th Street East, Saskatoon, SK. The samples were analyzed in our laboratory for the identification of asbestos.

The results for the samples submitted were obtained by examination in accordance with the current USEPA 600/R-93/116 Method for the analysis of asbestos in building materials using polarized light microscopy and dispersion staining techniques. The detection limit of this method is listed as less than 1% by volume.

This test report relates only to the materials sent for examination and any use or extension of the information by the client of these results is the responsibility of the client. If any questions arise on the results of the attached information please contact our office. Thank you for this opportunity of service!

The floor plans identifying the sample locations and photos of the bulk material samples are attached to this report.

Sincerely,

Dustin Fraess
