

Exclusion Of Perimeter Walls

Building and Development Permit Applications

Development of basements are required to be provided with mandatory framing, vapour barrier and final inspections to ensure compliance with City of Saskatoon Council Policy C09-029 (Residential Review and Inspections), the Building bylaw (N0. 9455), Uniform Building and Accessibility Standards Act (UBASA) and the National Building Code of Canada (NBC).

The vapour barrier, with a permeance not greater than $60 \text{ ng}/(\text{Pa}\cdot\text{s}\cdot\text{m}^2)$, is to provide a barrier to diffusion of water vapour from the interior into wall spaces in accordance with the NBC.

Owner's Proposal

I, _____, request that the vapour barrier not be inspected to meet the requirements stated above and the building and development permit excludes the construction and inspection of the perimeter walls. I accept full responsibility for any damage, to the property or individuals, which may result from not having the vapour barrier inspected.

I also acknowledge that the exterior walls exclusion will be disclosed by the City of Saskatoon to any third party requesting a Property Information Disclosure for this property.
