

# KEEP YOUR CAT SAFE, HEALTHY & HOME

Love the Outdoors? Do it Safely.  
Roaming freely puts your cat at risk.

## Outdoor Safety Tips:

- Use a harness & leash (no longer than 2 metres)
- Try a catio or pet backpack
- Always supervise your cat outdoors

**Roaming cats face \$100+ fines** and are more likely to become lost, injured or contribute to stray populations.

## MICROCHIP + LICENSE

Each year, Saskatoon Animal Control picks up over **1,500 confined cats**.

Only **7%** are returned to their families.

**Over 90%** of those returned cats had a microchip linked to a valid pet license.

**Licensing your cat provides:**

- ✓ ID & proof of ownership
- ✓ Shelter while you're contacted
- ✓ Safe and fast return

Link your pet's microchip to their **Pet License!**

## SPAY OR NEUTER

An unspayed cat and her kittens can produce **over 400,000 cats** in a lifetime.

Spaying or neutering:

- Prevents unwanted litters
- Reduces spraying and heat cycles
- Helps control disease
- Improves temperament and sociability
