

Wandering CATS love KITTEN around.

CATS IN OUR COMMUNITY.

In 2021, the Saskatoon Animal Control Agency picked up **1,599** confined cats. Only **126** of those cats were returned to their owners.

At-large cats continue to contribute to the community cat population in Saskatoon. Community cats are often the offspring of stray, abandoned and at-large cats that are not spayed or neutered.

Ensure your cat is safely enjoying the outdoors.

HAVE YOUR CAT SPAYED OR NEUTERED.

- Reduce unwanted litters and cat overpopulation.
- A single, unspayed female cat and her offspring can produce more than **400,000** cats in their lifetimes.

NEVER ALLOW YOUR CAT TO ROAM AT-LARGE.

- Teach them to walk with a harness and leash.
- Invest in a catio (cat patio).
- Try a pet carrier backpack.
