

Introducing your **NEW**
utility statement...

everything
just got
clearer

- ✓ Less complicated, more understandable
- ✓ Easier to view billing sections
- ✓ Clearly stated charges
- ✓ Less cluttered and complex details
- ✓ Doing our part for the environment, we've reduced the length of your bill by printing less paper

City of
Saskatoon

Residential and commercial customers, we've made it easier for you to view more detailed rates information - if and when you want it.

Explore the new easy-to-use online Consumption Calculator at saskatoon.ca/utilityrates or call us at **306-975-2400** with any questions you may have about your utility bill, or, email revenue@saskatoon.ca

The Government of Canada's Carbon Pollution Pricing System

The Government of Canada has implemented a carbon pollution pricing system, which will impact your electricity bill.

- Starting April 1, 2019, a **Federal Carbon Charge** will be clearly identified on your utility statement.
- The Federal Carbon Charge will be calculated based on the amount of electricity you use.
- Although the Government of Saskatchewan is challenging this pricing system in court, it still applies during the legal process.

For more information on the carbon pollution pricing system, visit canada.ca and search for 'Saskatchewan and pollution pricing.'

Say goodbye to your paper utility bill...

Switch to the convenience of online utility billing. **eBill** is your most environmentally friendly choice. It's quick and easy to go paperless!
