

WHAT: Construction Project at Wastewater Treatment Plant

WHEN: Beginning Summer 2019

WHERE: H. McIvor Weir Wastewater Treatment Plant, 470 Whiteswan Dr.

Digester and Heating Upgrades

This 3-year project includes the construction of a fourth digester and required ancillary equipment which will improve treatment capacity for solids and gas at the Wastewater Treatment Plant. This project also includes the construction of a new Gas Scrubbing and Heating Building which will allow biogas from the digesters be captured, cleaned, and used to fuel an upgraded heating system to provide the required heat for all four digesters.

Common questions

Will there be any additional traffic near the Wastewater Treatment Plant?

You may see additional traffic near the Wastewater Treatment Plant to support construction activities. Due to the residential location of the Wastewater Treatment Plant, all large traffic will be required to use the appropriate Haul Route which is Lenore Drive. We apologize for the inconvenience.

Will there be any additional noise near the Wastewater Treatment Plant?

You may hear noise from construction activities including hydro-excavation, drilling and demolition near the Wastewater Treatment Plant. All work will occur Monday to Friday between 7 a.m. and 6 p.m. We apologize for the inconvenience and will continue to monitor the noise level.

Will there be any additional odour near the Wastewater Treatment Plant?

This project is not expected to increase odour near the Wastewater Treatment Plant.
