

COMMERCIAL ENERGY LOAN PROGRAM

Qualified Energy Professional Attestation Form

This form may be used, where permitted by the City of Saskatoon under the Commercial Energy Loan Program, in place of an ASHRAE Level II audit. It must be completed by a qualified Energy Professional for eligible energy efficiency and/or water conservation projects. The supporting analysis must establish an energy or water baseline and identify projected savings sufficient to assess the viability of the proposed retrofit measures.

Project Address	
Primary Contact	

Professional Information

Name		
Organization		
Phone Number	Work:	Cell:
Email Address		
Professional Type	☐ Professional Engineer ☐ Certified Energy Manager (CEM) ☐ Registered Energy Advisor ☐ Other: _____	

Basis of Analysis

- ☐ Supporting analysis is based on Open Technologies Virtual Decarbonization Plan
- ☐ Supporting analysis is based on alternative professional assessment approach (describe):

--

Methodology and Data Integrity

☐ I confirm that assumptions, baseline conditions, calculations, modelling limitations and uncertainties have been considered using recognized engineering practices.

Estimated Performance Outcomes

Performance Metric	Estimated Value	Estimated Cost Savings
Energy Reduction (%)		
Annual Energy Savings (kWh)		
Annual Energy Savings (m3)		
Annual Water Savings (m3 or ft3)		
GHG Reduction (%)		
Annual GHG Reduction (tCO2e)		
Total Annual Cost Savings (\$)		

Feasibility Statement

The proposed measures are technically feasible, appropriately sized, and expected to achieve the stated performance if implemented as described.

Acknowledgement

This attestation is provided in support of a Commercial Energy Loan Program application and may be relied upon by the City of Saskatoon in its review and funding decision process. The City may request clarification or supporting documentation and may review or audit the underlying analysis.
