Coordinated Community Safety Plan Highlights
130 Idylwyld Drive – Women's Drop-In Centre

The Coordinated Community Safety Plan outlines the City of Saskatoon's safety and security support for the Government of Saskatchewan's service provider, Saskatoon Tribal Council (STC), while it operates a Women's Drop-In Centre at 130 Idylwyld Drive. STC will monitor and be responsible for the immediate perimeter of their facility.

Safety personnel will support the facility staff and participants, as well as members of the community and public in the larger area around the facility. Safety personnel will provide regular wellness checks, connect people with supports where possible, de-escalate situations, and when required, contact the Saskatoon Police Service regular patrol for additional support.

Patrol area 	Boundaries of the priority patrol area are: 22nd Street to Idylwyld Dr to 23rd Street to Pacific Avenue, including Wall Street between 22nd and 23rd Street. There will also be patrols in the areas outside of these boundaries and data will be collected to monitor activity and if the priority boundaries need to be expanded.
Coordinated Public Safety Personnel 	An ongoing randomized presence will be available in the immediate surrounding and nearby areas to assist with any transitional concerns such as: • Social disorder • Public Safety (pedestrian paths, alleys, parks and green spaces) • Violence and weapons • Identification of temporary, unsafe and inadequate structures in green spaces, parks and thoroughfares **Saskatoon Fire Department - 24 hours a day** Uniformed Fire Inspectors, Fire Bylaw Inspectors and Fire Community Support personnel will provide both a regular focused patrol during the daytime and a random patrol response throughout a 24-hour cycle. They will attend to the Women's Drop-In Centre and surrounding area to observe, address situations posing a risk where practical, engage in conversation, and offer supports in addition to site and area inspections. Frontline Fire emergency personnel will respond to emergency calls, 24 hours a day. **Saskatoon Police Service - 24 hours a day** Alternative Response Officers (ARO's), Bike Unit Officers (operating in vehicles during the winter months) and Uniformed Patrol Officers will attend to the Women's Drop-In Centre and surrounding neighbourhood area in a marked vehicle and conduct conversation and visual inspection of the area. They will provide both a regular focused patrol during the daytime and a random patrol response throughout a 24-hour cycle. Patrol officers will respond to emergency calls, 24 hours a day. **Commissionaires - 7-day-per-week, extended-hour security** Commissionaires will provide 7-day-per-week, regular mobile patrols as well as full-time on-site patrols during periods of higher activity, dedicated to the designated patrol area. Focused periods: On weekdays between 6am to 9am, and 3pm to 6pm, Commissionaires will provide a constant presence patrolling the Wall Street area between the YWCA daycare and the back of the Women's Drop-In Centre. This will provide a visible presence before and during when children get dropped off in the morning, and then again during pick-up. They will provide regular patrol checks of the full patrol area throughout other times of the day until 8pm and be available to respond to calls upon request. **City of Saskatoon Indigenous Support Teams** Teams will provide random patrols of the full patrol area between 1pm and 9pm and will be available to respond to calls upon request. The safety patrol schedule will be adjusted as needed.

November 2026. Subject to change.

Coordinated Communications	Communications will be consistent, transparent and collaborative between all parties: The Saskatoon Tribal Council, Saskatoon Fire Department, Saskatoon Police Service, the City of Saskatoon, Commissionaires, and Province of Saskatchewan meet weekly to discuss data, activities and problem-solve. Summarized updates will be provided to Downtown YXE BID and other key organizations or businesses upon request.
Coordinated Data and Analysis	Key data is tracked, evaluated and assessed. Commissionaires and STC provide regular reports to the City which are shared with SPS, SFD and the Province and used to determine when and how to adjust the coordinated community safety plan to address emerging concerns.
